Summary

My career aspiration is to thrive in a professional environment within a dynamic and expanding organisation, where I can wholeheartedly contribute to both the technical growth of the company and my own professional development. I possess a strong ability to quickly adapt to new environments and embrace emerging technologies.

Skills

MS Office, JavaScript, CSS / SCSS, Angular, Vue, Node.js, Figma(UX), React, HTML, SQL

Education

Bachelor of engineering (B.E - CSE)
Paavai Engineering College (Anna University)
2017 - 2021

Certifications

- Angular Complete Guide
- ReactJs

Work Experience

Hakuna Matata pvt ltd

Dec 2021 - Present

Full-Stack Developer

I worked as a developer at Hakuna Matata Pvt for the past 3 years. I actively contributed to numerous projects focused on issue resolution and optimization, including code upgrades and enhancements.

Doodleblue

Jul 2021 - Nov 2021

Junior Developer

I served as an intern at doodleblue Solutions for four months in the role of a front-end developer. I undertook comprehensive training in HTML, CSS, and JavaScript.

Projects

Bank of India

2022

Successfully contributed to the development and implementation of various loan pages. Enhancing the user experience and functionality of the Bank of India project.

Happisales, Back-End Developer Support

2023

Played a pivotal role in the new implementations and issue resolution. Significantly improving the overall performance and functionality of the project.

Max Healthcare, Medical In-patient Module

2023

Developed a full-featured healthcare management system for Max Healthcare, managing patient records, prescriptions, and other medical details. Implemented key features such as user authentication, data visualization, and secure data handling.

Tree Plantation

2024

Developed an admin application for managing tree plantation and sapling activities for Green Earth Initiatives. Features included tracking sapling orders, scheduling plantations, and managing volunteers. Ensured data security and compliance with environmental regulations.

Auction India (TVSE), Auction CMS & User Application

2024

Developed an admin and customer web application for managing the auction and bidding activities for products. Features included the dynamic components using angular and angular material; Tailwind CSS configuration used for styling.

RedFM, React Business-to-Customer Application

2024

Developed and maintained a dynamic web application for RED FM using React.js and Tailwind CSS, ensuring a seamless user experience across devices. Designed responsive UI components for key modules, including live radio streaming, program schedules, and event highlights, adhering to modern design principles.

Dedalus, Healthcare Web Application

2025

Developed a full-featured healthcare management application at staff level. Mainly used Angular and Tailwind for UI creation. NgRx for state management.

Maersk Training, Staff Data Management Application

2025

Worked on a React-based Maersk training application with Azure AD authentication and role-based access. Implemented global state management using Redux for seamless user session handling and data flow.
